No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1981 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 13

NUMBER 1, JANUARY 1981

ARTHUR C. GRAESSER, SCOTT P. ROBERTSON, AND PATRICIA A. ANDERSON. Incorporating Inferences in Narrative Representations: A Study of How and Why. 1

ROGER TOURANGEAU AND ROBERT J. STERNBERG. Aptness in Metaphor 27

DEDRE GENTNER. Verb Semantic Structures in Memory for Sentences: Evidence for Componential Representation 56

ANNE L. DEAN, SUZANNE CHABAUD, AND EARL BRIDGES. Classes, Collections, and Distinctive Features: Alternative Strategies for Solving Inclusion Problems 84

DAVID KLAHR AND MITCHELL ROBINSON. Formal Assessment of Problem-Solving and Planning Processes in Preschool Children 113

NUMBER 2, APRIL 1981

DOUGLAS L. HINTZMAN, CARLA S. O'DELL AND DAVID R. ARNDT. Orientation in Cognitive Maps 149

WILLIAM F. BREWER AND JAMES C. TREYENS. Role of Schemata in Memory for Places 207

FRIEDRICH WILKENING. Integrating Velocity, Time, and Distance Information: A Developmental Study 231

RICHARD E. NISBETT, HENRY ZUKIER, AND RONALD E. LEMLEY. The Dilution Effect: Nondiagnostic Information Weakens the Implication of Diagnostic Information 248

JAMES E. JASTRZEMBSKI. Multiple Meanings, Number of Related Meanings, Frequency of Occurrence, and the Lexicon 278

NUMBER 3, JULY 1981

KATHERINE B. MCKEITHEN, JUDITH S. REITMAN, HENRY H. RUETER, AND STEPHEN C. HIRTLE. Knowledge Organization and Skill Differences in Computer Programmers 307

L. H. SHAFFER. Performances of Chopin, Bach, and Bartok: Studies in Motor Programming 326

LORRAINE E. BAHRICK, ARLENE S. WALKER, AND ULRIC NEISSER. Selective Looking by Infants 377

MARGOT D. LASHER. The Cognitive Representation of an Event Involving Human Motion 391

BARBARA TVERSKY. Distortions in Memory for Maps 407

JUDITH M. KEARINS. Visual Spatial Memory in Australian Aboriginal Children of Desert Regions 434

Number 4, October 1981

Martin J. Guyote and Robert J. Sternberg. A Transitive-Chain Theory of Syllogistic Reasoning 461

Perry W. Thorndyke. Distance Estimation from Cognitive Maps 526

Barbara Anne Dosher. The Effects of Delay and Interference: A Speed-Accuracy Study 551

Daisy L. Hung, Ovid J. L. Tzeng, and David H. Warren. A Chronometric Study of Sentence Processing in Deaf Children 583

Author Index for Volume 13 611

NOTICE TO CONTRIBUTORS:

The publishers wish to call your attention to the following instructions for preparing manuscripts for *Cognitive Psychology:* Format and style of manuscript should conform to the conventions specified in the "Publication Manual" of the American Psychological Association (1200 Seventeenth Street, N.W., Washington, D. C. 20036; 1974 Revision, $3.00), with the exceptions listed below. Please note that it is the responsibility of the author that manuscripts for *Cognitive Psychology* conform to the requirements of this journal.

INFORMATION FOR AUTHORS

Cognitive Psychology publishes original empirical, theoretical, and tutorial papers, methodological articles, and critical reviews dealing with memory, language processing, perception, problem solving, and thinking. This journal emphasizes work on the organization of human information processing. Papers dealing with relevant problems in such related areas as linguistics, artificial intelligence, and neurophysiology also are welcomed provided that they are of direct interest to cognitive psychologists and are written so as to be accessible to them and to make their relevance clear. There are no maximum or minimum length restrictions for journal articles.

All manuscripts should be submitted to the Editor: **Dr. Earl Hunt, Department of Psychology, University of Washington, Seattle, Washington 98195.**

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Cognitive Psychology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

A manuscript submitted for publication is judged by three main criteria: (a) appropriateness of the subject matter for this journal; (b) significance of its contribution to knowledge; and (c) clarity and conciseness of writing. No changes in a manuscript may be made once it has been accepted and is in press.

Form. Type at least double-spaced throughout, including tables, footnotes, references, and figure captions, with 1 inch margins on all sides. Submit four complete copies to expedite processing. One copy remains the property of the journal. Each copy *must* include all figures and tables.

Number the pages consecutively. *Page 1* should contain the article title, author(s) names(s), and affiliation; at the bottom of the page type a short title, not exceeding 35 characters and spaces, and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. The address for correspondence should be given as a footnote to the appropriate author's name. *Page 2* should contain a short abstract, approximately 100 to 150 words in length.

Headings. The organization of the paper must be clearly indicated by appropriate headings and subheadings.

Abbreviations. Do not use final periods with units of measure that are abbreviated (cm, sec, kg, etc.) in text of in tables, except for "in." (inch).

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Number displayed equations consecutively, with the number placed in parentheses to the extreme right of the equation. Refer to numbered equations as Equation 1 or say "the first equation." Punctuate equations to conform to their place in the syntax of the sentence.
